# **Building secure, flexible payment flows with PCI Proxy & Datatrans**

**Payments and software: Better when connected**

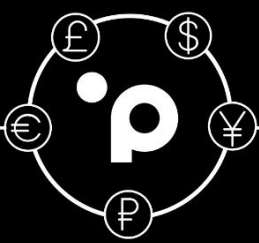

In 2019, we specialised in VAT refunds and currency conversion for hotels and retailers

We also become an acquirer, processing payment card transactions

Our goal was to become an integrated global payments and software provider

Advent International  
EURAZEO

Advent International invested in Planet to become co-owners with Eurazeo

We joined forces with 3C Payment offering hoteliers acquiring services alongside currency conversion

We began our journey to build expertise in retail and hospitality

datatrans.

PCI Proxy

PROXIMIS  
Unified Commerce

HOISTGROUP

protel

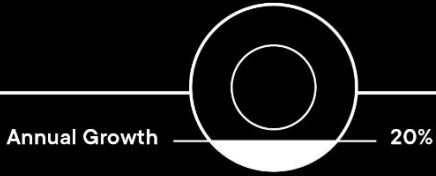

Together we imagined easy, invisible payments

With investor backing we joined forces with four other companies

Building expertise and gaining new customers

Connecting the very best expertise to power better experiences

- Reconciliation

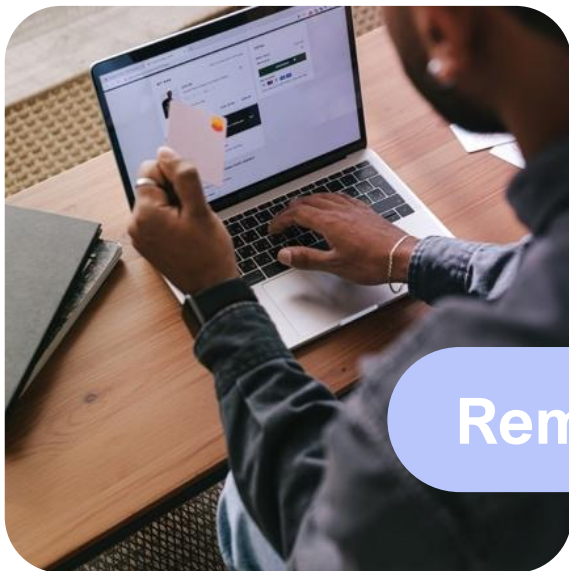

Integrations

- Redirect and Lightbox
- Mobile SDK
- Secure fields
- API endpoints
- Plugin

# Why choose Planet?

Build and scale secure payment flows, leveraging PCI Proxy and Datatrans gateway from Planet.  
Work with one partner for a flexible and secure solution tailored to the travel industry.

Remove friction

## Better serve your customers by removing friction

Datatrans gateway makes paying online and in-app seamless for customers. With high-volume transaction capability and reliability, Datatrans is built to scale with you.

Work with one partner

## Avoid vendor lock-in with tailored solutions from Planet

Simplify payment flows and reporting with one partner that empowers you to control data while minimising compliance burden.

Manage data securely

## Tokenise customer payment data and reduce PCI compliance

PCI Proxy and Datatrans together allow you to choose how you collect customer payment data, while storing and managing that data securely across your payment flows.

# Navigate PCI compliance in-house.

Merchants need to handle the collection, storage, and management of large amounts of credit card information from various online sources, all while adhering to PCI DSS regulations.

- ✗ Risk of data breaches
- ✗ Risk of regulatory fines
- ✗ Risk of being in PCI scope
- ✗ Requires dedicated team of experts
- ✗ Requires robust encryption
- ✗ Meeting PCI requirements

**PEAKWORK**

**planet**

# Simplify PCI-compliance, shift the responsibility to Planet.

PCI Proxy provides Merchants with scalable ways to collect, store and manage the use of credit card information from any online channel in a PCI-compliant environment on their behalf.

- ✓ Avoid storing card data internally
- ✓ Avoid fines
- ✓ Minimise PCI-scope
- ✓ Reduce audit costs
- ✓ Compatible with any of your integrations
- ✓ Focus on driving sales

Today's most advanced companies use PCI Proxy to tokenize and store sensitive payment data because achieving PCI compliance should not take ages, slow down product sprints or cost a fortune.

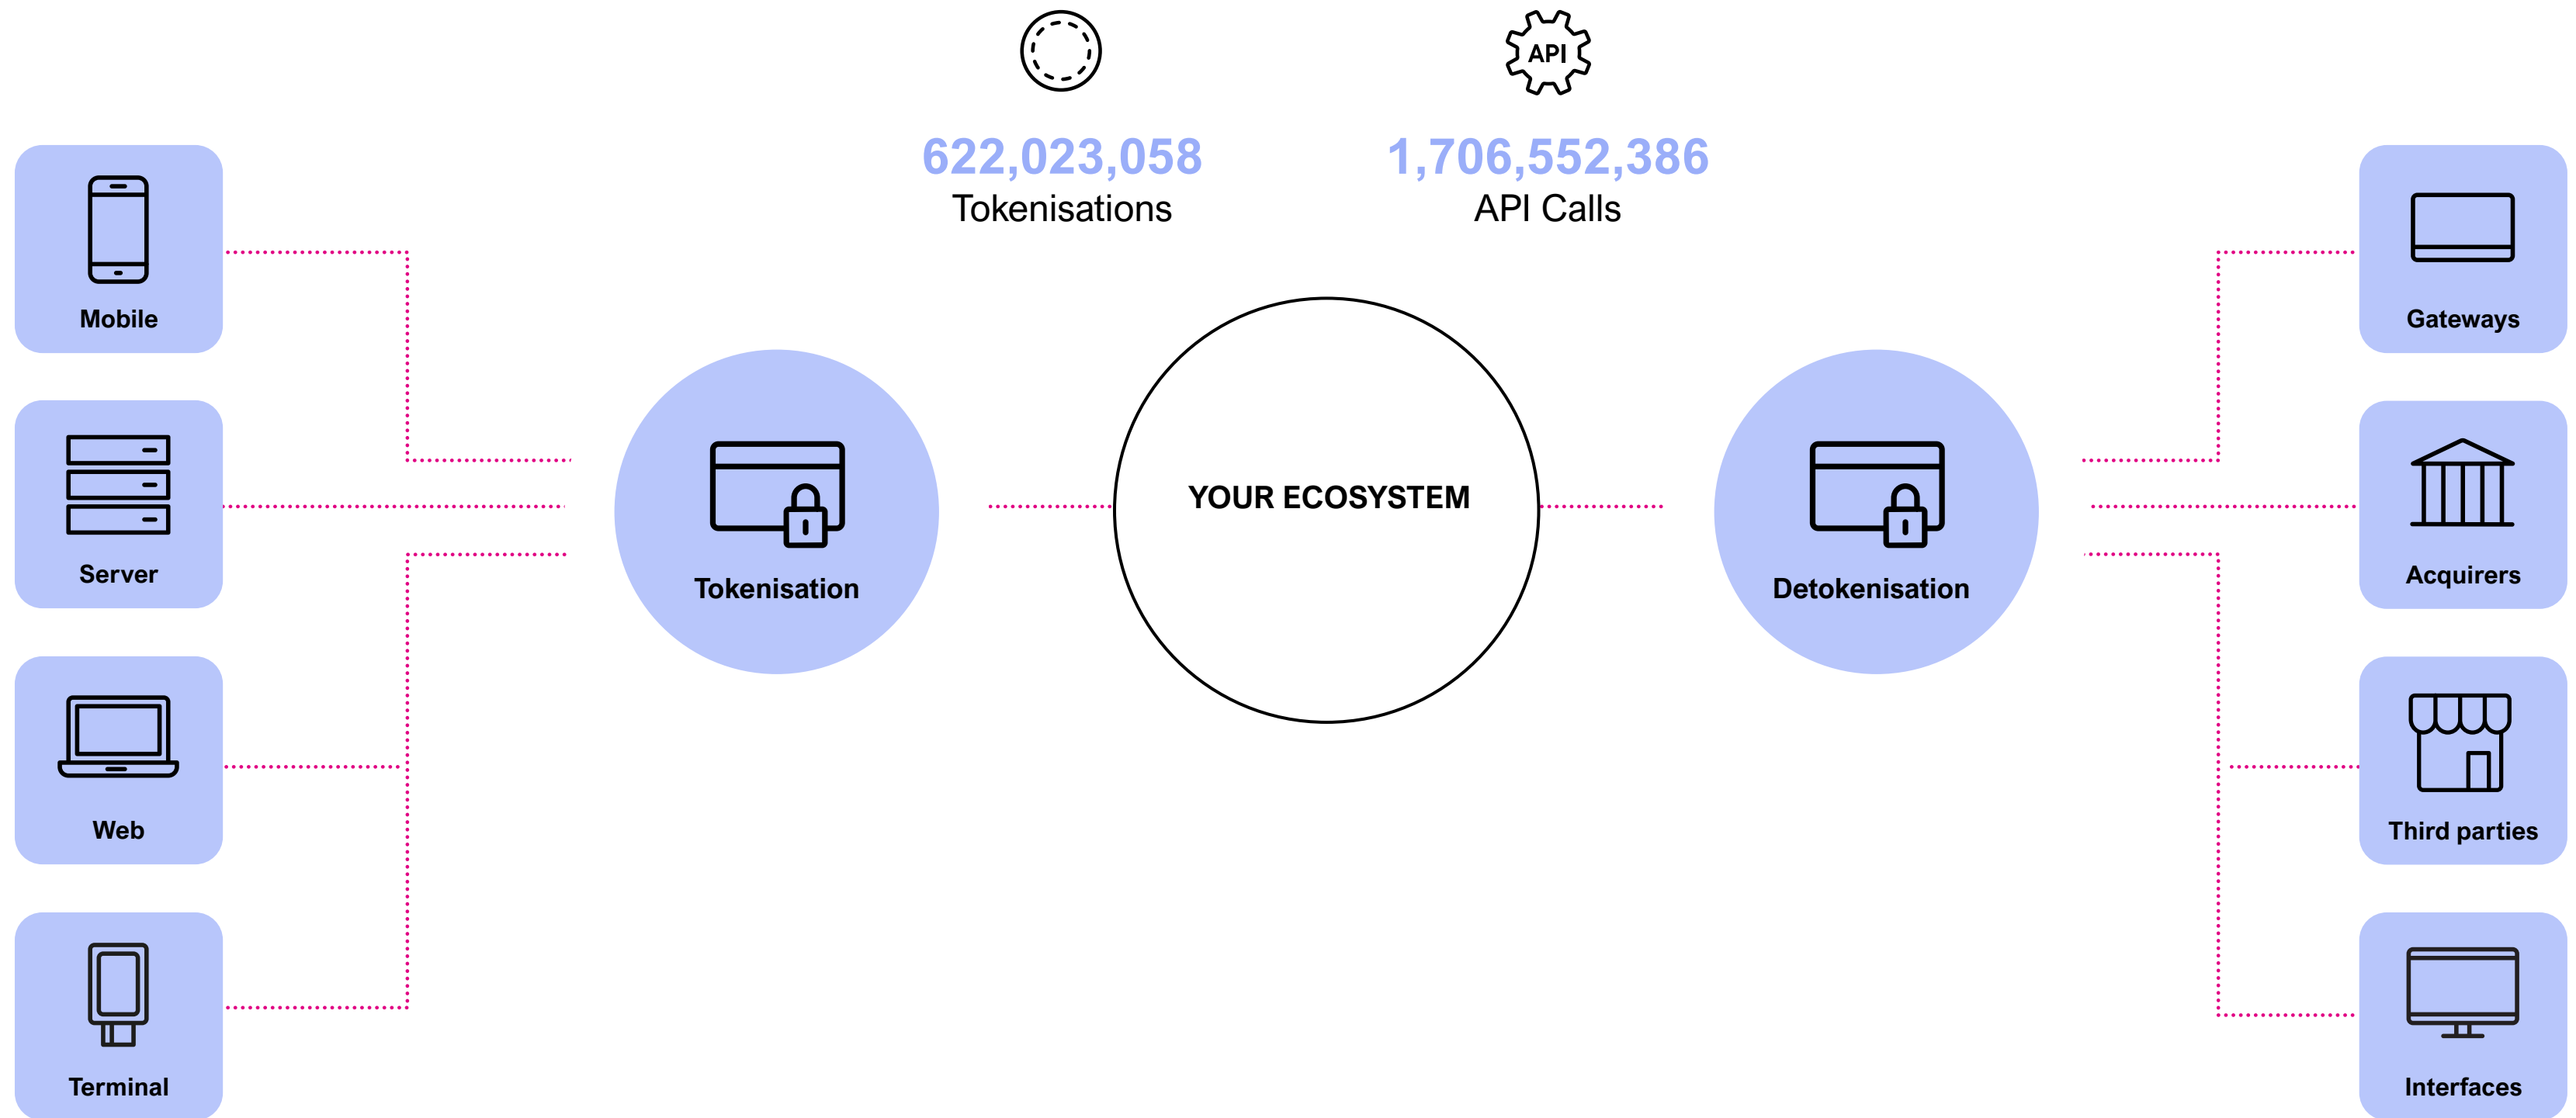

Go beyond tokenising card details:

# Collect and store tokens however you want

pci proxy<sup>®</sup>
